

Congratulations to The Inn on Lake Superior!

The Lake Superior Binational Program has chosen The Inn on Lake Superior as a recipient of its sixth annual Environmental Stewardship Award in the U.S. **BUSINESS** category!

The Inn's management and staff have demonstrated exceptional leadership and dedication to environmental improvements through ongoing sustainable efforts at the inn located near the Lake Superior shore. Actions include development of a Green Team to plan and implement actions; non-chemical lawn care practices; reduction of waste by substituting reusable products; energy and water saving devices; recycling; and educating others about sustainable practices.

These actions helped meet the following goal for sustainability that was established in 2000 by the Lake Superior Binational Program in its Lakewide Management Plan:

Human use of the Lake Superior ecosystem by all people in the watershed should be consistent with the highest social and scientific standards for sustainable use. Land, water and air use in the Lake Superior ecosystem should not degrade it, nor any adjacent ecosystems.

We thank the management and employees at the Inn on Lake Superior for outstanding work that protects the natural environment of the world's largest freshwater lake and for serving as a model for sustainability for other businesses.

On behalf of the Lake Superior Binational Forum, we applaud your contributions to improving the Lake Superior watershed, and wish you well in your future endeavors.

Bruce Lindgren
U.S. Co-Chair
Lake Superior Binational Forum
Herbster, Wisconsin
(715) 774-3444

Glen Dale
Canadian Co-Chair
Lake Superior Binational Forum
Thunder Bay, Ontario
(807) 964-2920

The awards program is supported by a grant from the U.S. Environmental Protection Agency's Great Lakes National Program Office and funding from Environment Canada.
